

World Health Care Networks: Closing Plenary

Saturday 24 July 2010

Notes: closing remarks by Dr Bev O'Keefe, General Practice New Zealand

- I am delighted to endorse my colleague Emil Djakic's recap of the key conference messages
- As we close this conference I am putting out the call for everyone here to go back to their workplace and create a ripple so that we may collectively make a wave to drive the changes necessary for a sustainable future.
- I also want to thank the AGPN Events Team for their superb organization, and our own team for their great work particularly around the programme
- I certainly believe that the conference has taken the relationship between the two organisations to a new level, which we look forward to building on.
- My thanks to everyone for coming to Auckland in winter, for their contributions, and I wish you all a safe journey home- or for those coming to the dinner, to bring their tickets with them.
- And on that note I am delighted to welcome the Mt Roskill primary school ukulele band as a fitting finale to celebrate our youth, and to motivate us to make their world a better one.
